

About Gawler Animal Hospital

Gawler Animal Hospital is 100% privately and locally owned by Dr Steve Crouch who has had an association with the practice stretching back over twenty years!

He and his family live locally and love the area and its pet-loving community.

Steve is passionate about the quality of his work and this is reflected throughout everything he does and the strong, client-focussed culture of the practice which has developed under his guidance.

With our fantastic team of vets, nurses and our dedicated customer care team, you can be assured of a high level of service when you bring your pets in for all their healthcare needs.

Our dynamic team of vets have an array of different strengths, including behavioural knowledge, ultrasonography, a strong focus on dental health, allergy management, orthopaedic and soft tissue surgeries as well as their ever growing knowledge for internal medicine cases. Our vet team have you and your pet covered!

Fear Free Practice

We always go above and beyond to provide a "fear free environment" for pets and their owners! We give lots of treats, take our time and make a big fuss of your pets. We want them to enjoy visiting us at the clinic. We designed our hospital with minimising your pet's stress in mind!

Having a pet is a lifelong commitment and here at Gawler Animal Hospital it's our privilege to be there with you every step of the way.

We have a very family friendly atmosphere at Gawler Animal Hospital, and this translates to happy staff, happy clients and happy pets.

Customer care ranks very high on our list of priorities, so you know you will be looked after just as well as your pets.

Gawler Animal Hospital is a Veterinary Surgeon's Board Accredited Hospital (one of only 23 such hospitals in South Australia). What this means is that we have to meet high standards to gain and maintain the hospital status, which means we're qualified to do a great job of looking after every aspect of your pet's care!

We're also accredited by the International Society of Feline Medicine as a gold-standard 'Cat Friendly Clinic'. This accreditation was the result of a lot of hard work and additional training to provide the facilities, staff, knowledge and focus on our feline patients.

You'll see the benefits when you bring your cats in to see us – much less stress and a more pleasant experience for all concerned!
